Construction on Highway 22 north of Killdeer delayed due to weather

The construction project on Highway 22, (approximately 13 miles north of Killdeer for approximately 8 miles) will be delayed until further notice due to weather conditions. The project will resume later this month as weather allows.

During the project, the highway will be graded and paved, additional passing lanes added and shoulders widened. Currently the work is taking place off the roadway, but a temporary gravel road will be constructed and used to maintain 2-way traffic during the project.

During the project

- A temporary road with a 25 mph speed limit will be utilized.
- Flaggers and pilot cars will be used as needed during construction.
- Gravel and oil may be present on the roadway.

The project is expected to be completed this summer.

The traveling public should use caution when driving through the construction zone. Motorists should allow extra distance between their vehicles and the vehicles in front of them, slow down and obey flaggers and posted signs.
